

## <tree> and <tree-column>

Creates Tree and TreeColumn.

Examples :

```
<tree style="SWT.VIRTUAL | SWT.BORDER | SWT.V_SCROLL "  
linesVisible="true" headerVisible="true" itemCount="20"  
      SWT.SetData="com.sheelapps.swtмл.examples.TestListener">  
<tree-column text="column 1" style="SWT.LEFT" width="150" />  
<tree-column text="column 2" width="100" />  
</tree>
```

```
<tree>  
<tree-item _text="TopLevel" />  
<tree-item _text="TopLevel 1" />  
<tree-item _text="TopLevel 2" />  
  
</tree-item>  
</tree>
```
