

SWTML Application Window Templates

Simple application window with Menubar, Toolbar, a composite and status label bar

```

<!-- Simple application window with Menubar, Toolbar, a composite and status label bar
-->
<shell>
<grid-layout
  <menubar>
    <menu-item>
      <menu>
        <menu-item>
        </menu-item>
      </menu>
    </menu-item>
    <menu-item>
      <menu>
        <menu-item>
        </menu-item>
      </menu>
    </menu-item>
  </menubar>
  <toolbar>
    <tool-item 1>
    </tool-item>
    <tool-item 2>
    </tool-item>
  </toolbar>
  <composite
    <label status bar>
    </label>
  </composite>
</grid-layout>
</shell>

```

Simple application window with Menubar, Coolbar, a composite and status label bar

```
<?xml
<!--Simple application window with Menubar, Coolbar, a composite and status label bar
<shell
<grid-layout
<menu

</menu

    Note: Add resize event to CoolBar to handle resize of bar.
        SWT.Resize="com.sheelapps.swtмл.examples.TestListener"
    // event code
    if(event.type==SWT.Resize) {
        if(Display.getCurrent().getActiveShell()!=null)
            Display.getCurrent().getActiveShell().layout();
    }
-->
<cool-bar

<composite
<grid-data
```

```
<!-- Add widgets here -->
</composite>
<label
</label>
</shell>
```

```
>
<label
</label>
</shell>
```
